

Commercia

Group 9 - Aspire

Ophelia Bianca Prilles | Kaye Samson | Johannabel Valenzuela

Product Description

Our product is a web application for renting commercial spaces, designed to streamline the rental process for small and medium-sized businesses (SMEs) and landlords. This all-in-one platform addresses common challenges, such as the lack of access to integrated tools, tedious manual processes, and inadequate cost forecasting solutions. With features like advanced property search filters, booking and leasing integration, cost estimation tools, and interactive neighborhood data, the platform empowers business owners to find the ideal rental space efficiently. For landlords, it provides property management tools to list, promote, and manage properties seamlessly. By offering a centralized, data-driven, and user-friendly solution, the platform saves time, enhances decision-making, and fosters better connections between tenants and property owners.

The idea emerged from observing the inefficiencies in the current process of renting commercial spaces. For example, café owners or retail businesses face challenges navigating multiple platforms or relying on agents, which is both time-consuming and resource-intensive. Additionally, many landlords lack modern tools for listing and managing their properties effectively.

The solution aims to bridge this gap by offering an **all-in-one platform** that streamlines browsing, booking, leasing, and payment processes. This unique value proposition saves time, provides data-driven insights, and delivers a seamless experience for both tenants and property owners.

Customer Persona

Our final target customers are small and medium-sized business owners (SMEs) seeking commercial spaces and landlords or property managers looking to rent out their properties. These customer personas were identified through customer validation activities, which highlighted the specific needs and challenges faced by both groups.

Customer Persona: SMEs

PROFILE

Entrepreneurs and business owners managing retail shops, cafés, offices, warehouses, or other commercial establishments.

NEEDS

- Efficient tools to discover affordable rental spaces that match their location, size, and budget requirements.
- Easy access to detailed property information, such as foot traffic data, neighborhood trends, and cost forecasts.
- A simplified process for scheduling visits and signing lease agree

PAIN POINTS

- Lack of centralized platforms to browse commercial spaces efficiently.
- Time-consuming and outdated manual processes for finding, inquiring about, and renting properties.
- Limited tools to assess profitability and predict rental expenses.

Customer Persona: Landlords and Property Managers

PROFILE

Individuals or companies managing commercial properties like retail spaces, offices, or warehouses.

NEEDS

- A digital platform to list and showcase properties to a wider audience.
- Efficient tools to manage listings, respond to inquiries, and finalize lease agreements.
- Access to insights and analytics to better understand their target renters and improve their offerings.

PAIN POINTS

- Difficulty in attracting tenants quickly due to lack of visibility.
- Reliance on multiple tools or services, which adds complexity and inefficiency.
- Limited options for promoting properties and gaining competitive market insights.

Target Market

Based on our research and validation, the final target market includes:

1. SMEs operating in industries such as retail, food and beverage, professional services, and logistics.
2. Landlords or property managers with commercial spaces for lease in urban or business-centric locations.

This target market was validated through feedback, which revealed a strong demand for an integrated platform that simplifies the rental process. By addressing the specific challenges faced by these personas, our product positions itself as a valuable tool for both tenants and landlords, offering efficiency, convenience, and enhanced decision-making.

Lean Canvas

PROBLEM

Small and medium-sized businesses (SMEs) face significant challenges when searching for commercial rental spaces, including:

- **Lack of a centralized platform:** Businesses struggle to find and compare available properties efficiently.
- **Time-consuming manual processes:** Managing inquiries, booking property visits, and handling lease agreements are tedious and prone to errors.
- **Inadequate tools for financial planning:** Businesses lack tools for forecasting costs, profitability, and assessing location suitability.

Landlords and property managers encounter challenges such as:

- **Low visibility:** Difficulty attracting tenants quickly due to limited exposure.
- **Inefficient property management:** Managing multiple listings and tenant inquiries is often cumbersome.

CUSTOMER SEGMENT

Our target customers include:

- **SMEs and entrepreneurs:** Business owners in retail, food services, office spaces, and logistics seeking accessible and affordable commercial spaces.
- **Landlords and property managers:** Individuals or companies managing commercial properties who need efficient listing and management tools.

SOLUTION

Our web application offers a centralized, integrated platform for:

1. **Browsing commercial spaces:** Filter properties by price, location, size, and type.
2. **Property management tools:** Enable landlords to list properties, upload images, and manage pricing.
3. **Booking and leasing integration:** Streamline scheduling visits and signing agreements.
4. **Cost estimation tools:** Predict expenses and analyze profitability by location and business type.
5. **Interactive maps:** Provide neighborhood data, foot traffic, and trends to aid decision-making.
6. **Social media integration:** Promote properties via social media channels for broader reach.

UNIQUE VALUE PROPOSITION

An all-in-one platform that simplifies the rental process for SMEs and landlords. The platform offers exclusive property listings, advanced data insights, and seamless lease management, saving time and ensuring optimal rental decisions for business growth.

CHANNELS

- **Website:** A responsive, user-friendly platform for property searches and management.
- **Social Media Marketing:** Leverage Facebook, Instagram, and LinkedIn for targeted advertising.
- **Real Estate Networks:** Collaborate with real estate agents and platforms to enhance property listing visibility.

REVENUE STREAM

We plan to generate revenue through:

- **Transaction-based fees:** A 5% commission on finalized lease agreements.
- **Pay-per-listing:** A flat fee of ₱112 per basic listing and ₱280 for featured listings.
- **Subscription plans:** Monthly fees for premium tools (e.g., ₱5,600/month for landlords using advanced analytics).

Projected Revenue Example:

- 500 properties listed monthly:
 - 300 basic listings (₱112): ₱33,600
 - 200 featured listings (₱280): ₱56,000
 - 100 lease agreements finalized (₱56,000 average rent, 5% commission): ₱280,000
- Total Monthly Revenue: ₱469,600**

COST STRUCTURE

Major costs include:

- **Platform development and maintenance:** ₱280,000/month for developer salaries, updates, and hosting.
- **Marketing and branding:** ₱168,000/month for SEO, social media ads, and content creation.
- **Customer support:** ₱112,000/month for maintaining a team to assist users.

Projected Monthly Costs: ₱560,000

KEY METRICS

- **Number of Listings:** Total properties listed on the platform.
- **User Engagement:** Daily and monthly active users.
- **Inquiries and Bookings:** Number of inquiries and scheduled property tours.
- **Leases Finalized:** Agreements signed through the platform.
- **Conversion Rate:** Percentage of inquiries converted to signed leases.
- **Customer Retention:** Returning users for new listings.
- **Revenue Per User:** Average income generated from each user.

UNFAIR ADVANTAGE

Commercia offers a **seamless, end-to-end solution** for the rental process. Unlike competitors, our integrated approach combines property browsing, financial insights, booking, and lease management into a single platform. This eliminates the need for users to juggle multiple tools or services, ensuring efficiency and convenience. Additionally, our advanced data analytics and

interactive mapping features give businesses and landlords actionable insights, setting us apart in the market.

Product Design

A. Process Flow Diagram

Figure 1.1 Commercia Process Flow Diagram

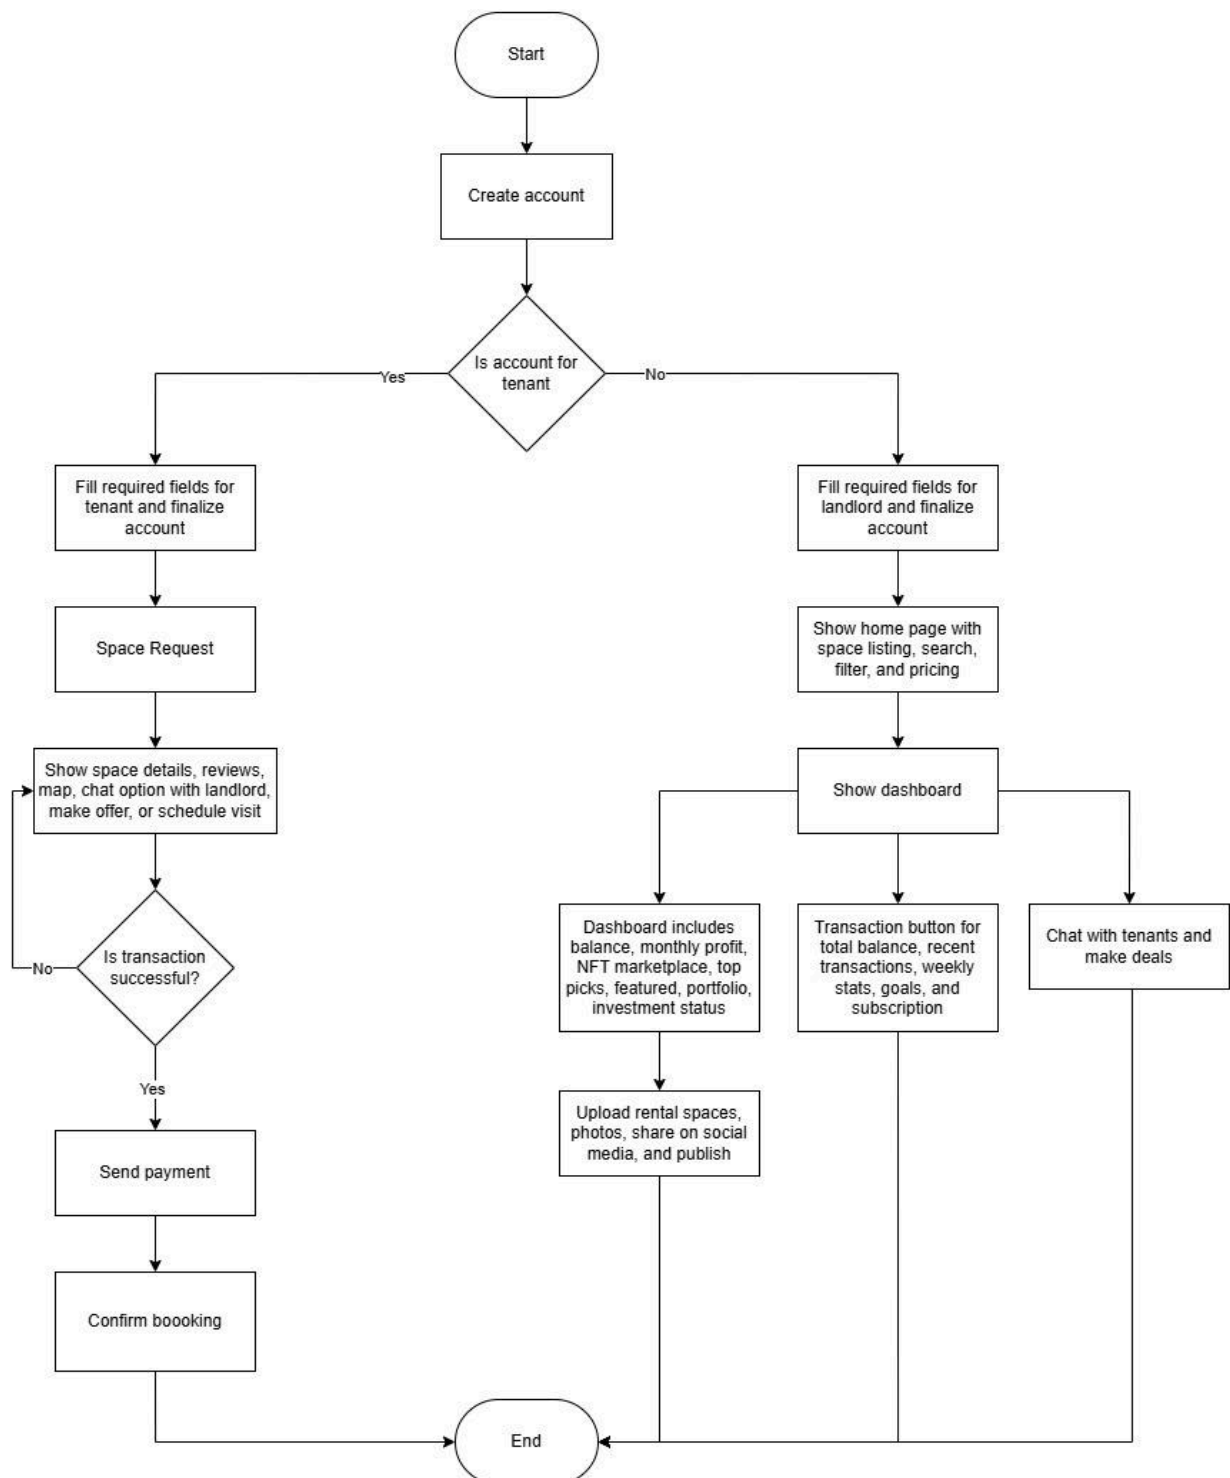

Figure 1.1 is the Process Flow Diagram that outlines the steps involved in Commercia, which is designed for landlords and tenants to interact efficiently. It begins with account creation, where the user specifies whether they are a tenant or a landlord. Based on this choice, the subsequent steps differ to cater to the specific needs of each user type.

Tenant User (Account)

1. Fill in the required fields to complete the tenant account setup.
2. Submit a space request.
3. View space details:
 - Reviews
 - Map
 - Chat option with landlord
 - Options to make an offer or schedule a visit
4. Determine transaction status:
 - **If successful:**
 - Proceed to payment.
 - Receive booking confirmation.
 - **If unsuccessful:**
 - Transaction ends.

Landlord User (Account)

1. Fill in the required fields to complete the landlord account setup.
2. Access the homepage with features:
 - Space listings
 - Search and filter tools
 - Pricing options
3. Navigate to the dashboard for key functionalities:
 - Overview of balance, monthly profit, and recent transactions.
 - Access to an NFT marketplace, top picks, featured portfolio, and investment status.
4. Manage rental spaces:
 - Upload rental space details and photos.
 - Share listings on social media.
 - Publish listings.
5. Use additional tools:
 - Transaction management (total balance, weekly stats, subscriptions).
 - Chat with tenants to negotiate deals.

The process further supports landlords with transaction management, tenant communication, and deal-making. This ensures streamlined operations for both parties and facilitates successful interactions on the platform. The diagram emphasizes simplicity and clarity, ensuring users can easily navigate and complete their tasks.

B. Entity Relationship Diagram

Figure 1.2 Commercia Entity Relationship Diagram (ERD)

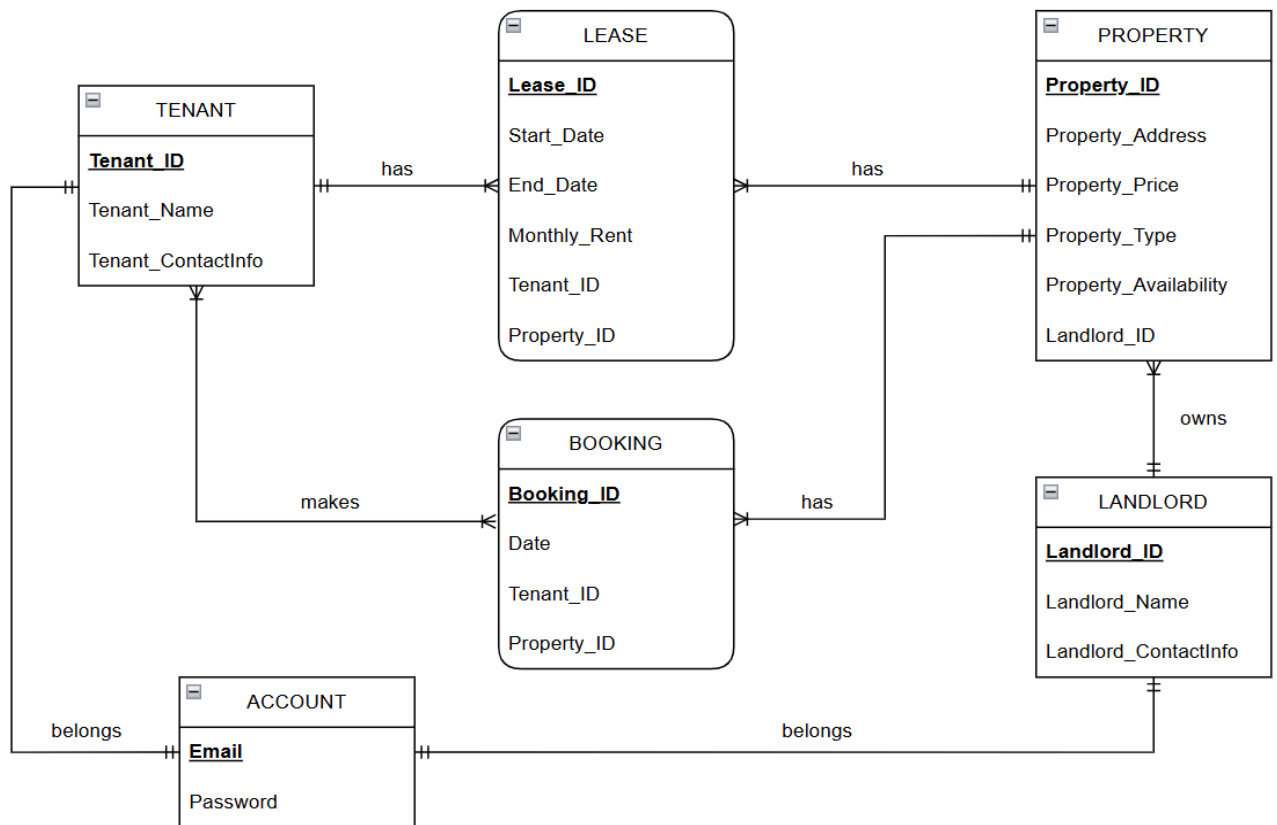

Figure 1.2 demonstrates the Entity Relationship Diagram (ERD) which is the structure and connections between key entities in Commercia. It organizes the system into six main entities: Account, Tenant, Landlord, property, Booking, and Lease, each with its attributes and relationships.

Entities

1. Account

- Stores the login credentials of users, including their email and password.
- Each account is linked to either a tenant or a landlord.

2. Tenant

- Contains details about tenants, such as their name and contact information.
- A tenant can:
 - Belong to an account.
 - Make property bookings.
 - Be associated with a lease agreement for a specific property.

3. Landlord

- It represents landlords with attributes like name and contact information.
- Each landlord:
 - Belongs to an account.

- Owns one or more properties.
- 4. Property
 - Represents the rental properties available in the system.
 - Attributes include property address, price, type, and availability status.
 - Each property is owned by a landlord and can be
 - Booked by tenants.
 - Leased through a formal agreement.
- 5. Booking
 - Captures property booking activities made by tenants.
 - Includes details such as booking ID, date, tenant ID, and property ID.
 - Acts as a preliminary step before a lease is finalized.
- 6. Lease
 - Represents the formal rental agreement between a tenant and a landlord for a specific property.
 - Attributes include the start and end dates, monthly rent, tenant ID, and property ID.
 - A lease solidifies the relationship between the tenant, landlord, and property.

Relationships Between Entities

- **Tenant and Account:** A tenant belongs to an account, enabling them to log in and use the system.
- **Landlord and Account:** A landlord also belongs to an account for system access.
- **Landlord and Property:** A landlord can own multiple properties.
- **Tenant and Booking:** A tenant can make bookings for properties.
- **Property and Booking:** Each booking is associated with a specific property.
- **Tenant and Lease:** A tenant enters a lease agreement for a property they book.
- **Property and Lease:** A lease is directly tied to a property.

The ERD provides an overview of how tenants, landlords, and properties are connected within the system. It ensures that all interactions, such as bookings and lease agreements, are properly documented and linked to the relevant entities. This design supports efficient management of the rental process, making it easier to handle bookings, leases, and property details systematically.

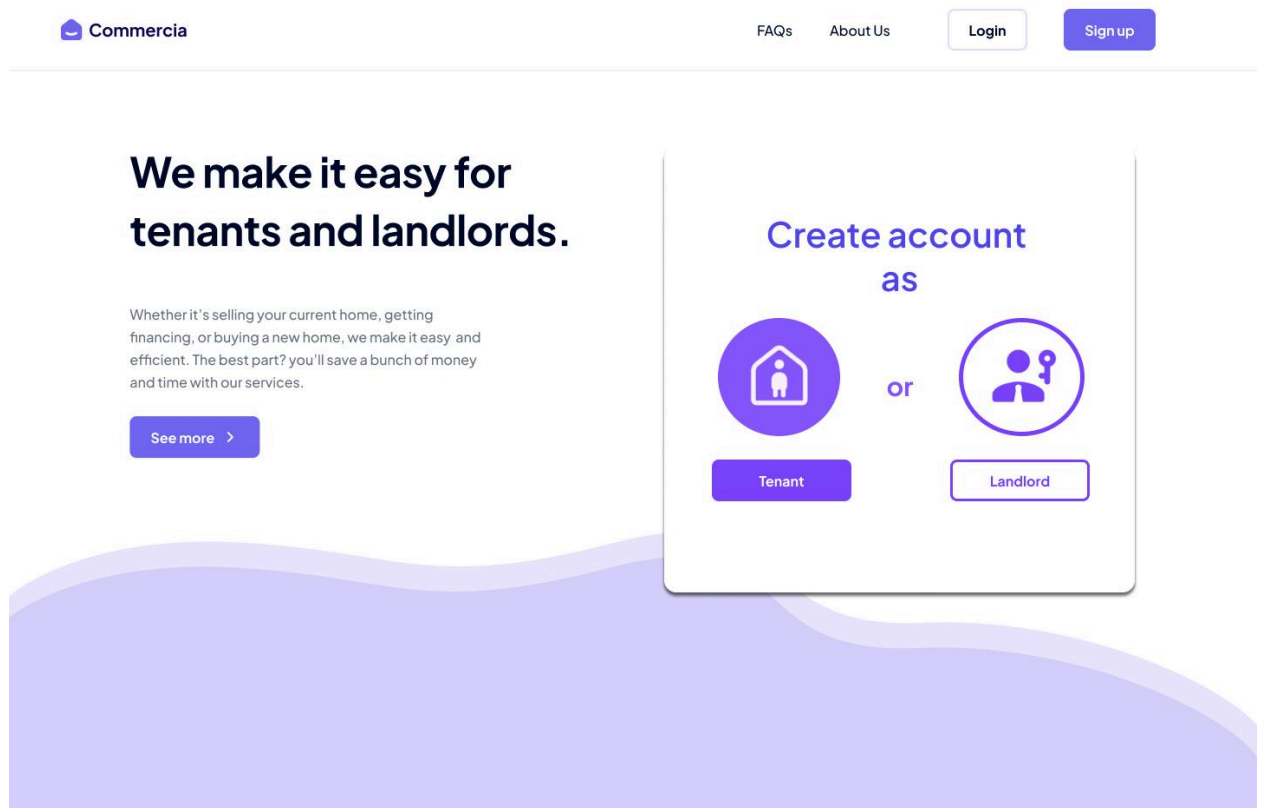

C. User Interface Design

The Figma prototype was created to design and visualize the user interface of the Commercia platform. It highlights the layout and functionality of key screens for tenants and landlords, including account creation, property listings, chat, and transaction management.

Provided is the link to explore the user interface design in detail:

CREATE ACCOUNT PAGE

This page is the entry point for users to create an account and choose their role: tenant or landlord. It sets the foundation for customizing the user experience based on the role selected.

Components:

- **User Role Selection:** Buttons for selecting "Tenant" or "Landlord."

Purpose:

The Create Account Page ensures users are categorized correctly, enabling the system to tailor subsequent pages and functionalities to their needs.

Tenant User (Account) SIGN UP PAGE

The screenshot shows a web page for 'Commercia' with a sign-up form for tenants. The header includes the logo, navigation links (FAQs, About Us, Login, Sign up), and a main content area with a sign-up form and a 'See more' button.

Header:

This page is where tenants log in to access their account.

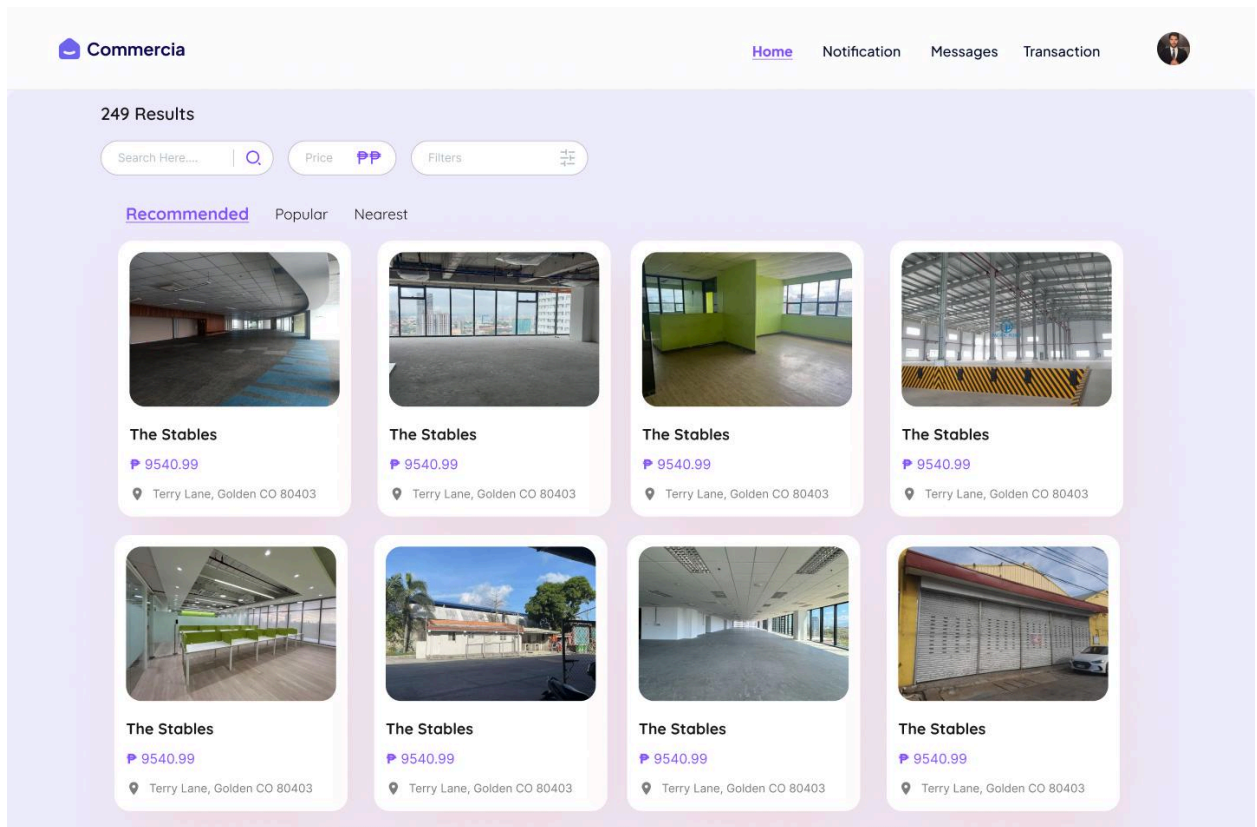

Components:

- **Email Address and Password Fields:** For login credentials.
- **Forgot Password Link:** Allows users to recover their accounts.
- **Sign In with Google:** Allows users to access accounts directly using their google account.
- **Sign In Button:** Authenticates the user and redirects them to the Home Page.

Purpose:

To provide secure and quick access to tenant accounts.

HOME PAGE

The main interface for tenants to browse available rental spaces.

Components:

- **Search Bar:** Enables tenants to search by location, price, or type.
- **Filter Options:** Sorts spaces by price, popularity, or distance.
- **Property Cards:** Displays key details like price, photos, and a brief description.
- **Navigation Menu:** Links to other features, like notification, messages and transaction history.

Purpose:

To streamline property discovery and give tenants a clear overview of available spaces.

★★★★★

I really like the place and goods ka transaction si sir.

Anthony Jennings

★★★★★

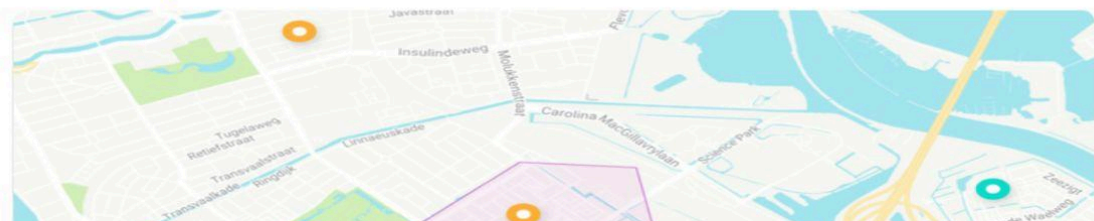

Easy transaction and good rental place.

Add comments

Done

Show map

Provides detailed information about a selected property.

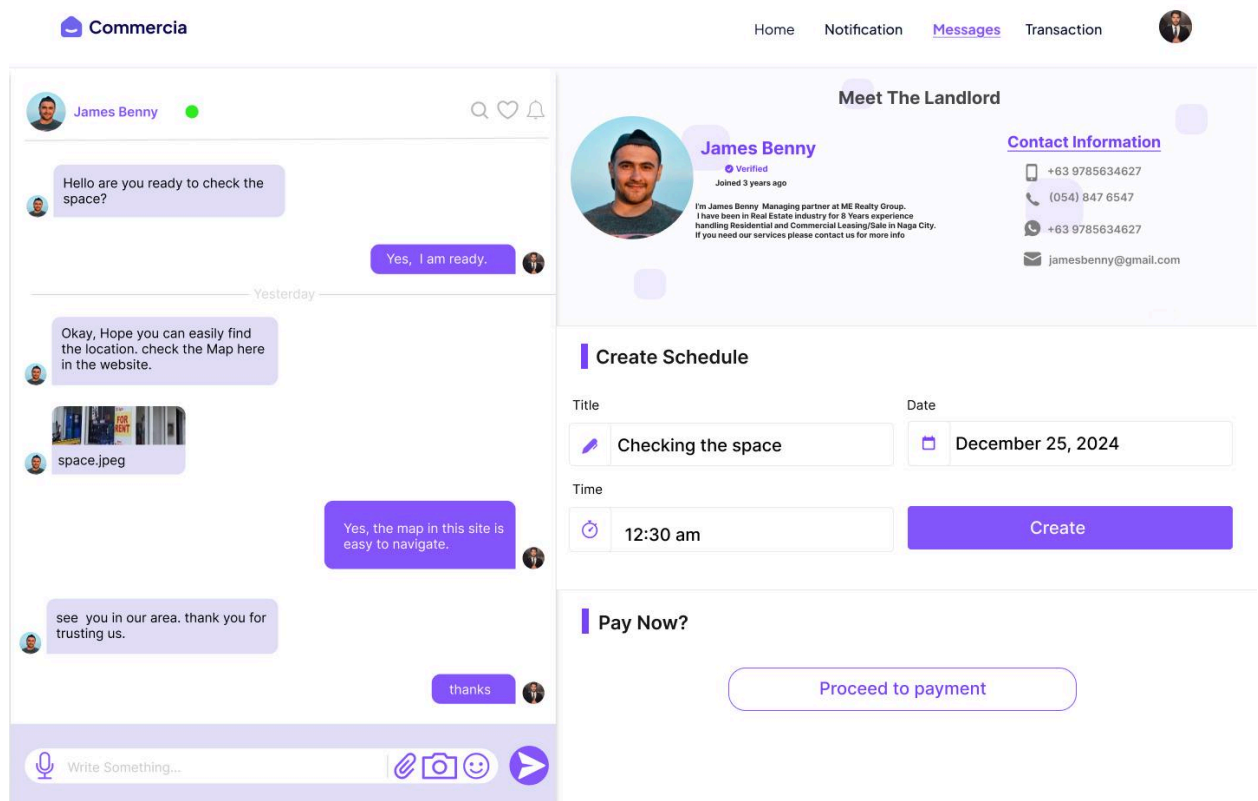

Components:

- **Photos Carousel:** Displays multiple images of the property.
- **Property Details Section:** Price, address, type, and other information.
- **Reviews Section:** Feedback from other tenants.
- **Map Integration:** Shows the location of the property.
- **Actions Section:** Buttons for initiating a chat.

Purpose:

To help tenants make informed decisions about potential rentals.

MESSAGES PAGE

Enables direct communication between tenants and landlords.

Components:

- **Chat Window:** Displays messages in a conversation format.
- **Action Buttons:** Options for scheduling visits or making payments.
- **Landlord Profile:** Shows the landlord's name, photo, and contact details.

Purpose:

To foster communication and facilitate negotiation between tenants and landlords.

Landlord User (Account)**SIGN UP PAGE**

The screenshot shows the 'Sign Up' page for a Landlord User account on the Commercia website. The page has a light purple background with a white sign-up form on the right. The form is titled 'Hi Landlord!' and includes fields for First Name, Last Name, Email address, and Password. Each field has a placeholder text and a blue icon (envelope for email, eye and lock for password). A blue 'Sign Up' button is at the bottom of the form. Below the button, there is a link: 'Already Have Account? [Sign In](#)'. On the left side of the page, there is a heading 'We make it easy for tenants and landlords.' followed by a paragraph: 'Whether it's selling your current home, getting financing, or buying a new home, we make it easy and efficient. The best part? you'll save a bunch of money and time with our services.' and a blue 'See more >' button. The top navigation bar includes the Commercia logo, 'FAQs', 'About Us', 'Login', and 'Sign up' buttons.

- **Photo Upload Feature:** Enables multiple image uploads.
- **Upload Button:** Finalizes the listing and makes it live.

Purpose:

To simplify the process of adding new properties to the platform.

MESSAGES PAGE

Allows landlords to communicate directly with tenants.

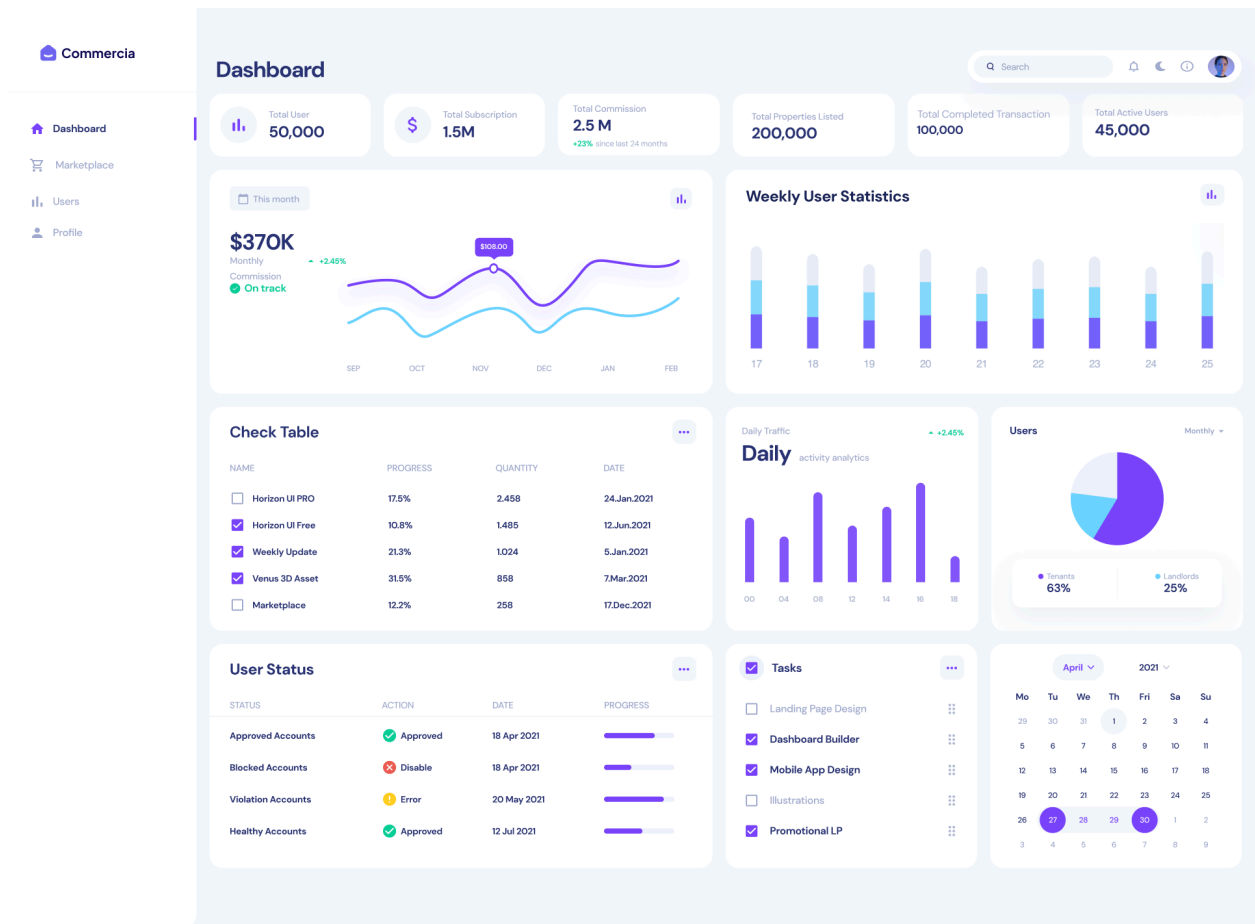

Components:

- **Chat Window:** Displays conversations in a structured format.
- **Tenant Profile Summary:** Shows the tenant's name, photo, and contact details.
 - **Schedule and Payment Details:** Shows the appointed schedule and payment transaction.
- **Action Buttons:** Options to send payment requests or confirm schedules.

Purpose:

To facilitate negotiations and ensure smooth communication between landlords and tenants.

ADMIN DASHBOARD

This screen provides an **overview of system statistics** and tools for administrators to monitor performance. The processes include:

1. Dashboard Metrics:

- **Key Stats:** Shows total users, subscriptions, commissions, property listings, completed transactions, and active users.
- **Weekly User Statistics:** A visual breakdown of user engagement trends.

2. Financial Overview:

- A graph displays revenue over time with additional indicators like monthly trends.

3. User Status:

- Tracks accounts with statuses such as approved, blocked, violations, or healthy.
- Allows admins to take actions on user accounts.

4. Task Management:

- Lists tasks (e.g., dashboard builder, mobile app design) with progress indicators.
- Admins can update task statuses or add new ones.

5. Daily Traffic Analytics:

- Tracks user activity by hour with bar charts.
- Helps analyze engagement trends and identify peak traffic hours.

6. Calendar:

- Displays upcoming dates and events to help admins stay on top of system deadlines.

MARKETPLACE MANAGEMENT PAGE

The screenshot displays the 'Marketplace Management Page' within a 'Commercia' application. The interface includes a sidebar with navigation links for Dashboard, Marketplace, Users, and Profile. The main content area features a search bar, filters for Location (All) and Date (All), and buttons for Export and New User. A table lists property listings with columns for User Name, Price, Location, Date, Remove Property Listing, and More. Below the table is a pagination control showing 10 rows. At the bottom, there is a 'Top Creators' section with a 'See all' button and a list of creators with their listing counts and ratings.

This screen focuses on **property listings**, filtering options, and actions related to the marketplace. The process includes:

1. **Search and Filter:**
 - Admins can search for listings using filters like location or date.
 - A filtered list of property items is displayed with relevant details (e.g., price, location, date).
2. **Property Listing Management:**
 - Lists properties with details like **User Name, Price, Location, and Date**.
 - Includes a **Remove Property Listing** option to delete unwanted or invalid entries.
3. **Actions:**
 - Admins can review individual property details and take actions (e.g., "Yes/No" toggles for status).
4. **Top Creators Table:**
 - Displays the top-performing users based on listing activity and ratings.

USER MANAGEMENT

The screenshot displays a user management dashboard with a sidebar menu and a main content area. The sidebar includes links for Dashboard, Marketplace, Users, and Profile. The main content area is titled 'Users' and contains four tables: Tenant, Landlord, Complex Table, and User Transaction.

Tenant Table:

nurw3h8tbb8oiqdi	Pending

This screen is divided into Tenant and Landlord sections, along with user statuses and actions. The process involves:

1. **User Listing:**
 - Displays a list of users categorized as either tenants or landlords.

- Each user entry includes a name, status (e.g., "Healthy", "Violation"), and available actions.
- 2. Available Actions:
 - View: Displays detailed information about the selected user.
 - Edit: Allows admins to modify user details such as name, status, or permissions.
 - Delete: Removes the user from the system.
- 3. Status Management:
 - The user's status (e.g., "Healthy" or "Violation") indicates compliance or potential issues.
 - Admins can review and resolve violations.
- 4. Other Tables:
 - Complex Table: Summarizes approvals, errors, and other system states.
 - User Transactions: Tracks user activity statuses, such as pending or completed transactions.
